

به نام خدا

دفترچه تلفن در الستیکس

برای راه اندازی این سامانه ، باید ابتدا اسامی رو در سامانه اضافه کنید تا هر وقت اشخاص تماس گرفتن به جای شمارشون اسمشون برای شما نمایش داده بشه . (این کار رو بوسیله پایگاه داده mysql نیز میتوانید انجام بدید)

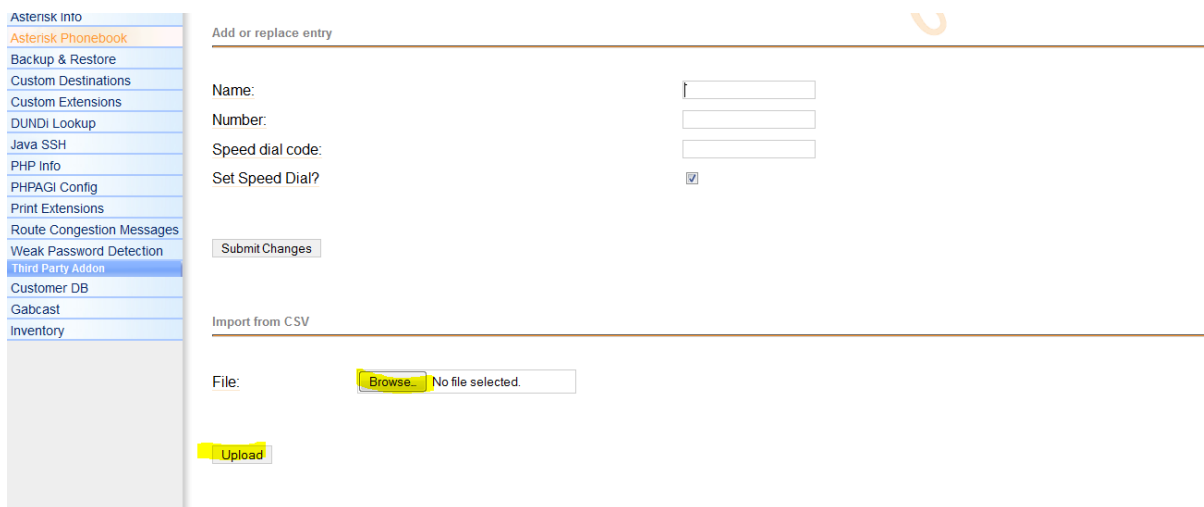

۱- اضافه کردن شماره ها :

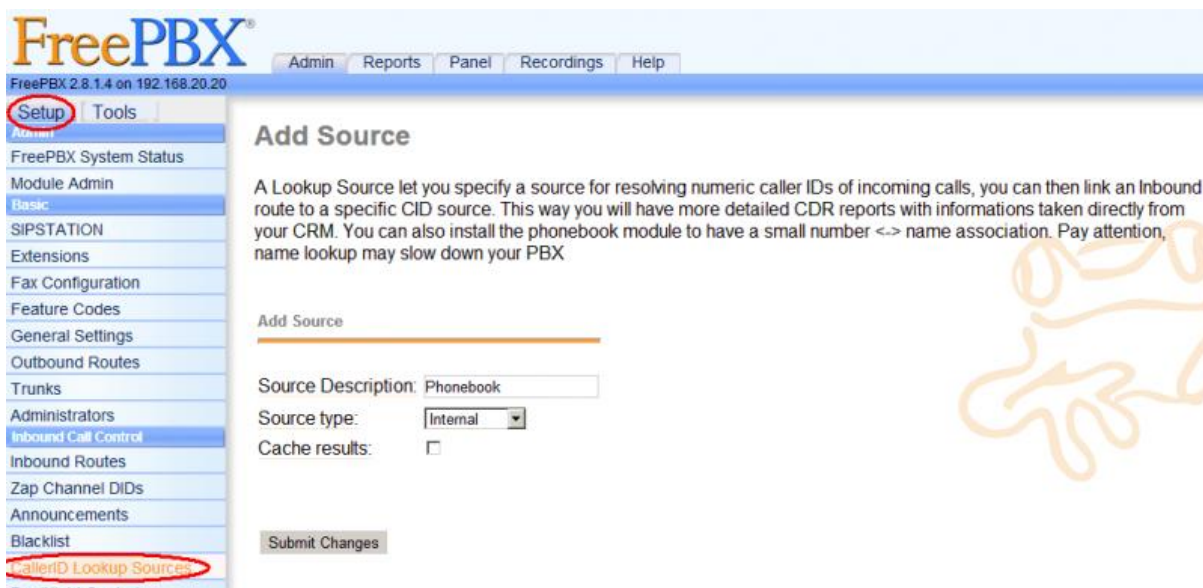

برای اضافه کردن دسته ای شماره ها باید به روش زیر عمل کنید و فایلی که در پیوست می باشد رو استفاده کنید .

به آدرس زیر رفته و طبق فایل Csv مربوطه را upload کنید.

Admin->tools>asterisk phonebook->import from csv

۲- روت کردن شماره به دیتابیس مربوطه (از دیتابیس mysql نیز میتوانید استفاده کنید)

FreePBX 2.8.1.4 on 192.168.20.20

CallerID Lookup Sources

Add Source

A Lookup Source let you specify a source for resolving numeric caller IDs of incoming calls, you can then link an Inbound route to a specific CID source. This way you will have more detailed CDR reports with informations taken directly from your CRM. You can also install the phonebook module to have a small number <-> name association. Pay attention, name lookup may slow down your PBX.

Add Source

Source Description: Phonebook

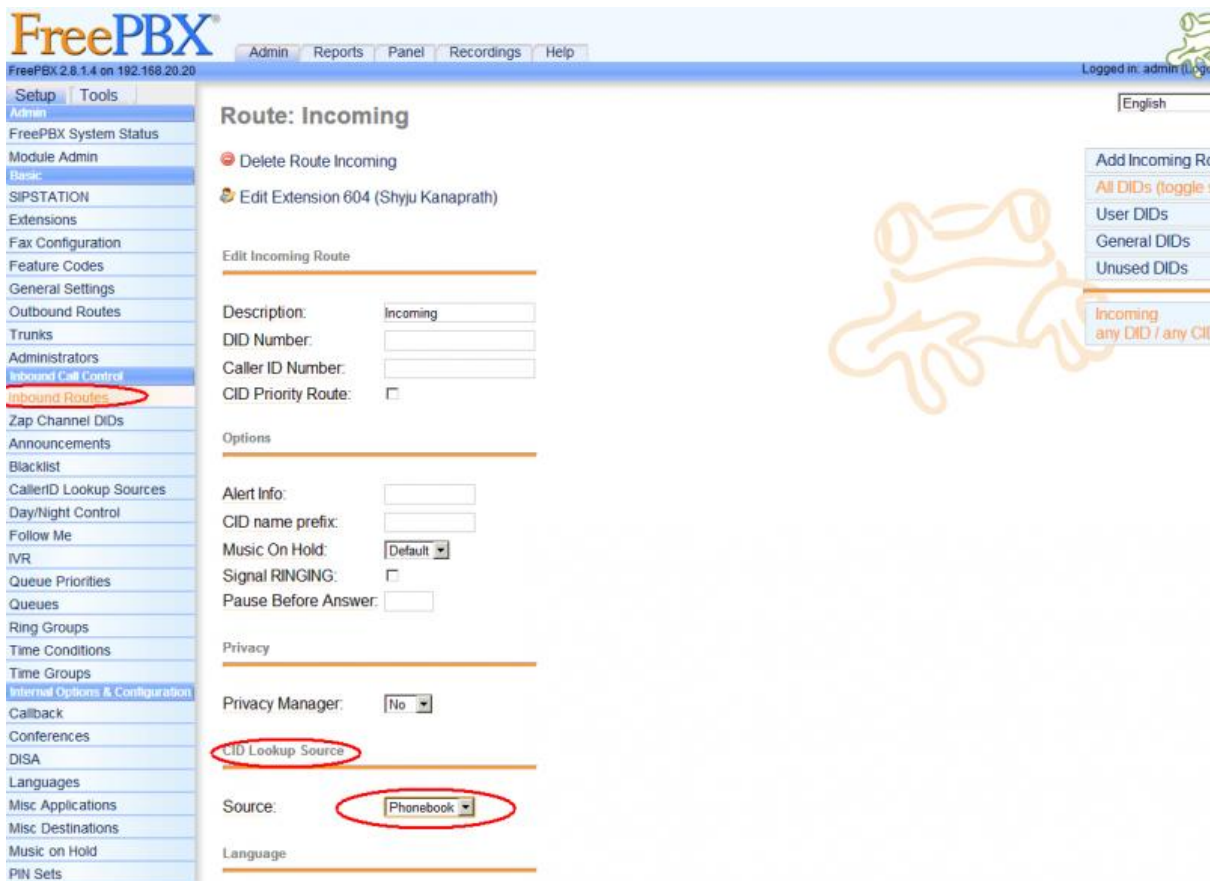

Source type: Internal

Cache results: ☐

Submit Changes

۳- اضافه کردن روت مربوطه در inbound route
